CONFIRMATION ABOUT ITX-FREE SOLVENT

“Isopropyl Thioxanton (ITX)”

Product: MEK-Solvent
Ink-Number: 77001-00030

The solvent with the mentioned article number above, is a solvent based on MEK, that dries physically.

“ITX” is a photo initiator, that is used for uv-drying print colours. Therefore is the usage of ITX not relevant for our CIJ-solvents.

Therefore we can confirm that the solvent which is supplied by LEIBINGER does not contain constitutional “Isopropyl Thioxanton” (ITX).
