## **CONFIRMATION ABOUT ITX-FREE SOLVENT**

**“Isopropyl Thioxanton (ITX)”**

**Product: MEK-Solvent**  
**Ink-Number: 77001-00030**

The solvent with the mentioned article number above, is a solvent based on MEK, that dries physically.

“ITX” is a photo initiator, that is used for uv-drying print colours. Therefore is the usage of ITX not relevant for our CIJ-solvents.

Therefore we can confirm that the solvent which is supplied by LEIBINGER does not contain constitutional “Isopropyl Thioxanton” (ITX).
